APPENDIX I.

[Vide answer to starred question No. 1062 asked by Sri K. Sattanatha Karayalar at the meeting of the Legislative Assembly held on 30th March 1959, page 835 supra.]

Rules of regulation of the Papanasam Reservoir across Thambarabarani river.

1. In the months of April and May all the natural flow in the river at the site of the dam less the quantity required by the Electricity Department for maintaining the power draft may be impounded subject to the obligations to the Papanasam mills of 0·6 cusecs and maintaining 3·5 cusecs for Papanasam falls both of which are limited to the natural flow in the river.

2. (i) In the period from June to March (following) impounding may be made by Electricity Department when the natural flow at the diversion weir exceeds the requirements of the existing irrigation as noted below :—

For the period (June first half)—1,650 cusecs.

For the period (June 16th to 31st March)—2,300 cusecs.

(ii) In addition to the quantities mentioned in rule 2 (i) the Electricity Department may temporarily impound quantities in excess of 1,400 cusecs in the Papanasam reservoir unless the Executive Engineer, Tirunelveli, for special reasons asks for an issue greater than 1,400 cusecs. The quantity thus impounded up to the irrigation requirements referred to in rule 2 (i) above shall be treated as irrigation credit.

3. (i) It shall be open to the Executive Engineer, Tirunelveli division, during the period from June to March to ask for any portion of the normal irrigation requirements specified in rule 2 (i) to be withheld and temporarily impounded in the Reservoir subject however to the flow required for power development being maintained.

(ii) The quantity impounded under rules 2 (ii) and 3 (i) less the proportionate evaporation from the reservoir will be available for issue for irrigation in addition to the normal issues whenever the Executive Engineer, Tirunelveli, requires it and at such rates as he may specify, but generally not exceeding 1,400 cusecs.

(iii) The computation of the quantities temporarily impounded under rules 2 (ii) and 3 (i) the quantity released and proportionate allowance for evaporation under rule 3 (ii) shall be balanced at fortnightly intervals. Any balance not drawn within two fortnightly periods after that in which impounding was made or before 1st November whichever is earlier shall lapse and become part of the Electricity Department storage.

[30th March 1959

(iv) If the reservoir surpluses when temporary storage impounded at the request of the Executive Engineer, Tirunelveli division, is held in the reservoir under rules 2 (ii) or 3 (i) such surplus will be counted as temporary storage withdrawn for irrigation.

4. The Executive Engineer, Public Works Department, Tirunelveli division, and the Divisional Electrical Engineer, Papanasam, will closely co-operate in order that the flows in the river may be regulated without any avoidable surplus at Srivaikuntam or wastage elsewhere.

5. These rules are tentative and will be reviewed in April 1959 or earlier if so desired by the Chief Engineers (Irrigation) and (Electricity). The two Chief Engineers shall also have power to deviate from these rules if necessary by mutual agreement.

Appendix II.

[Vide answer to starred question No. 1065 asked by Sri K. Sattanatha Karayalar at the meeting of the Legislative Assembly held on 30th March 1959, page 837 supra.]

I

[Vide clause (*a*) of the Legislative Assembly Question.]

***Number of persons reported missing to the Police in* 1956, 1957 *and* 1958.**

Area.	1956.	1957.	1958.
Madras City	521	448	539
Municipal towns	494	570	667
State	1,095	1,089	1,317

II

[Vide clause (*b*) of the Legislative Assembly Question.]

Number of boys, girls, women and men reported to be missing out of the number given in Annexure I.

Category of persons missing.	*Madras City.*			*Municipal towns.*			*State.*		
	1956.	1957.	1958.	1956.	1957.	1958.	1956.	1957.	195
